

Table 1.

The mean, standard deviation and Cronbach's Alpha for all of the constructs

| Scale | Alpha | Mean | SD |
|---------------|-------|-------|------|
| RWA | 0.77 | 3.24 | 1.52 |
| Avoidance | 0.92 | 1.525 | 0.98 |
| RWA (context) | 0.85 | 2.95 | 1.54 |
| Enact | 0.80 | 4.481 | 1.59 |

Table 2

Means, standard deviations, and correlations with confidence intervals of the constructs

| Variable | M | SD | 1 | 2 | 3 |
|-----------------------|------|------|---------------------|---------------------|--------------------|
| 1. rwa_comp | 3.24 | 1.52 | | | |
| 2. rwa_context_comp | 2.95 | 1.54 | .61** [.56, .66] | | |
| 3. enact_context_comp | 4.48 | 1.59 | .30** [.22, .37] | .20** [.13, .28] | |
| 4. avoid_comp | 1.52 | 0.98 | .25** [.17, .32] | .26** [.18, .33] | .05 [-.03, .13] |

Note. * $p < .05$. ** $p < .01$.

Fig. 1

The mean difference of norm enactment in different social domains.

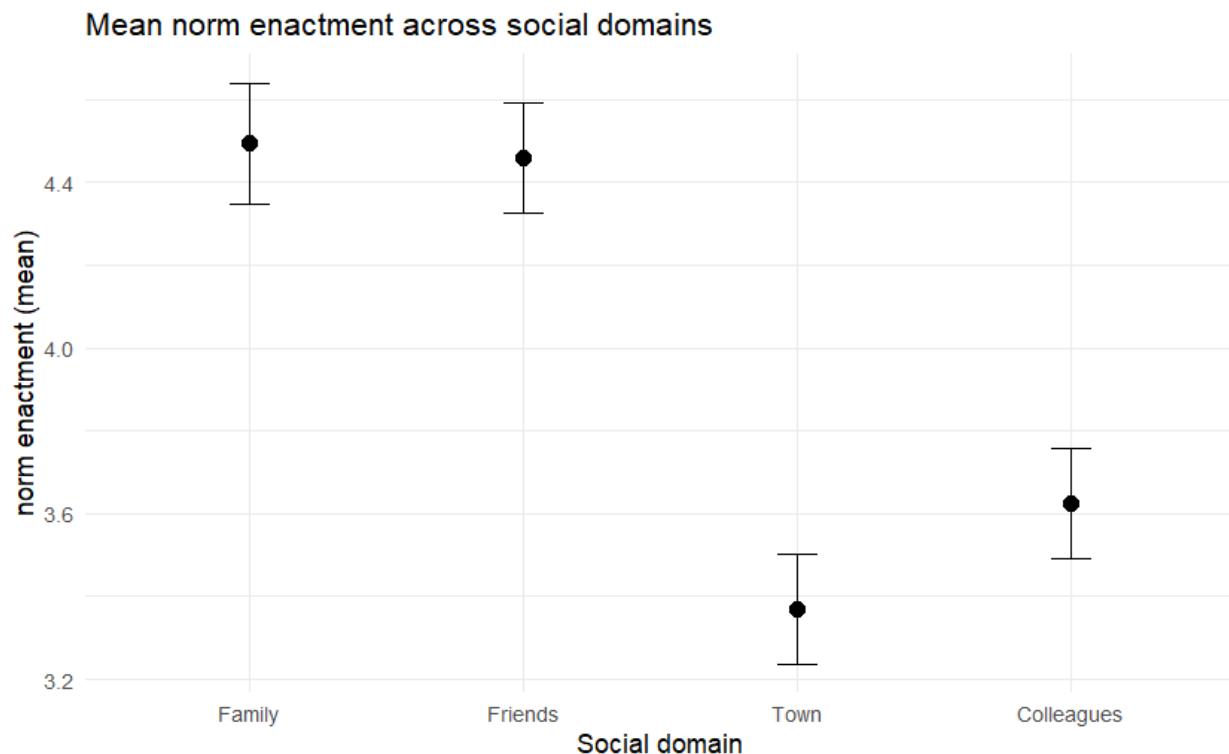

Fig. 2

Interactions between perceived close-group authoritarianism and group norm enactment on individual authoritarianism
